Patients with DLM
Synchronous or metachronous CRLM
Surgical intervention due to other CRLM
No CRLM left to motivate surgery
ctDNA
DLM not detectable during surgery
DLM detectable (visual/palpable) during surgery
Follow up (1)
CEIOUS suggested
detectable
not detectable
Resection or ablation
Leave in situ
Resection or ablation
Follow up (2)
Follow up (1)
Follow up (2)
Follow up (1)
Hepatocyt specific MRI every third months one year +ctDNA, thereafter local practice
Follow up (2)
According to local practice
