

## **Presentation av Föräldrainformation om autism – engelska**

### Group information for parents of children with autism

The aim is to provide general information about autism in order to create a better understanding of children's difficulties and possibilities, and to provide examples of how the environment can support children's development.

Content:

- Diagnostic information and parents' perspective
- Communication, social interaction, behavior and stress
- Difficulties with eating, going to the toilet, and sleeping
- TEACHH – Treatment and Education of Autistic and related Communication handicapped Children (Tydliggörande pedagogik) and motor skills

The group information will be provided across 3 sessions that build on each other, which is why it's important that you attend all of them. Please cancel if you can't attend!
