

Questionnaire for parents – language

Health check-up when your child is 2.5 years old

When you and your child visit the child health center (BVC), we will check on your child's communication and language development. We would appreciate it if you could answer the following questions at home before your visit. If you are more than one parent, you can fill this questionnaire together. The questions will serve as a basis for discussion. You will also be able to ask your own questions during your visit to the child health center (BVC).

Name of the child: _____ Child's date of birth: _____

Date: _____ Answered by: _____

What languages are spoken in the family: _____

1. Are you concerned about your child's speech and language development?
☐Yes ☐No
2. Does your child show an interest in communicating and talking with other children and adults?
☐Yes ☐No
3. How many words can your child say?
(The words don't have to be pronounced correctly, but you should be able to understand what your child means.)
☐0–25 words ☐25–50 words ☐more than 50 words
4. Does your child prefer to use gestures instead of speech, for example shaking their head to say "no," waving, or pointing?
☐Yes ☐No
5. Can your child put two or more words together to form short sentences?
☐Yes ☐No
6. Language proficiency isn't just about being able to speak, but also about being able to understand. Does your child understand longer sentences, such as "go get the teddy bear in the kitchen"?
☐Yes ☐No
7. Does your child have trouble chewing and/or swallowing?
☐Yes ☐No

Please bring the completed questionnaire with you to your appointment at the child health center (BVC). We will discuss your answers and what we observe together during the visit.
