Welcome to the midwifery clinic

Your parenthood starts now!

To make everything go as well as possible, we expect you to prepare by reading the information (in Swedish) on 1177 before each visit: [Midwifery visits during pregnancy in Region Västra Götaland - 1177](#)

- You will have a primary midwife throughout your pregnancy, but you will probably also see other midwives along the way.
- To ensure your pregnancy checks happen on time, you may need to visit a different midwifery clinic for some of your visits.
- Your partner or support person is welcome to accompany you to every visit except for one between 25 and 32 weeks of pregnancy, when you should come alone. Children should not be accompanied to the midwifery clinic.
- You need to arrive 10 minutes before your scheduled visit so that your blood pressure can be measured correctly.
- You will receive an invoice if your visit is not canceled at least 24 hours in advance or if miss your visit.
- From your second visit onwards, you will get access to the Support and Treatment Platform. There you can find the help information package called "*Stöd till blivande föräldrar*" (in Swedish), which covers the period from early pregnancy until 2 to 3 months after delivery.
