

Vaccinations for you who are 65 years or older

The risk of getting sick with serious infections increases with age. Therefore, anyone who is 65 years or older is offered at Västra Götaland several important vaccinations.

VÄSTRA
GÖTALANDSREGIONEN

You can get vaccinated at your health center or at a vaccination clinic.

Vaccination against covid-19 is given during the autumn

Vaccinations are free for recommended groups:

- You who are 75 years or older.
- You who are between 65 years and 74 years old and belong to a medical risk group.
- You who are 65 years or older with daily care at home, for example through home care or residential care homes (SÄBO).

Vaccination against influenza is given in the autumn

You need to get vaccinated every fall to have good protection against influenza. The vaccination is free of charge for those over 65 years.

Vaccination against pneumococcus is given all year round

Pneumococci are bacteria that are the most common cause of pneumonia. You are advised to get vaccinated once every five years.

- Vaccination is recommended for those 75 years or older. It is free of charge.
- If you are between 65 years and 74 years old, vaccination is recommended. It is free of charge if you belong to a medical risk group.
