

Vaccinations for those aged over 65

The risk of becoming ill from serious infectious diseases
increases with age.

That's why everyone in Västra Götaland who is aged 65 or
over is offered several important vaccinations.

1177

VÄSTRA
GÖTALANDSREGIONEN

You can get vaccinated at your medical care centre or at a vaccination clinic.

Covid-19 vaccinations are done in the autumn

The vaccination is free for anyone who is:

- Aged 75 or over
- Aged between 65 and 74 and belongs to medical risk group
- Aged 65 or over and receives daily care at home (e.g. home help services, or if you live in a care home)

You need to get vaccinated every autumn to ensure you are well protected.

Influenza vaccinations are done in the autumn

The vaccination is free for anyone who is:

- Aged 65 or over

You need to get vaccinated every autumn to ensure you are well protected.

Vaccinations against pneumococci are done all year round

Pneumococci are bacteria that can cause serious illness in older people, e.g. pneumonia or sepsis.

The vaccination is free for anyone who is:

- Aged 65 or over

You only need to get vaccinated once to ensure good protection with the updated vaccine from 2026.
