
Welcome to the Urgent Care Clinic at the Department of Hand Surgery

Information for patients and visitors

Urgent Care Clinic

At the Department of Hand Surgery Urgent Care Clinic, patients with acute and semi-acute hand injuries are assessed.

The queuing system at the Urgent Care Clinic is based on medical priority, i.e., the most severe injuries are treated first. As a result, there may be a waiting period before you can see a doctor. After the doctor has examined you, a decision will be made about which treatment is most appropriate for your case.

If your injury requires surgery, we will try to plan this on the same day or within the next few days.

Before your appointment

1. You must be fasting, i.e. you must not eat, drink, smoke or use tobacco 6 hours before your appointment. You may drink clear drinks (water, juice, coffee & tea without milk) until 2 hours before your appointment.
2. You must present a valid photo ID.

After arriving at Mölndal Hospital

1. Go to Check-In 2 (*Incheckning 2*) and register.
2. Take elevator F to the Hand Surgery Clinic's patient reception (*Handkirurgimottagning*) on the 9th floor.
3. Fill out a Health Declaration form which is available in the waiting room.

Welcome to the Dept. of Hand Surgery Urgent Care Clinic at:

Date/Time: _____

Traveling to and from Mölndal Hospital

It is not recommended to drive home when your hand is injured and bandaged. Medical travel is defined as travel between your registered home address and a medical care provider. You are entitled to compensation for travel for medical purposes with the cheapest mode of transport. Public transport should be used whenever possible. An injured hand is not normally sufficient reason to travel by taxi.
